

## Claims

1. Document-filing notebook of the invention, comprising a cover consisting of two leaves, front leaf (1) and back leaf (2), assembled together by a binder (3), and inner notebook pages (4) connected to the binder (3) between the two leaves (1, 2), characterized in that the notebook pages (4) are detachable, and in that inner index sheets (6) with tabs (7) are included that are inseparably connected to the binder (3) and that make it possible to file notebook pages (4) separated from the binder (3) in the various compartments created by the inner separation sheets (6).

2. Filing notebook of Claim 1, characterized in that each notebook page (4) includes a scored line (5) that is parallel to the binder (3) in proximity to it, and along which the notebook page (4) can be detached in order to file it in a compartment between two adjacent inner separation sheets (6).

3. Filing notebook according to Claim 1 or 2, characterized in that the inner separation sheets (6) are arranged at the end of the notebook, between the pages (4) of the notebook and its back leaf (2).

4. Filing notebook according to one of the preceding claims, characterized in that the tabs (7) are arranged at different heights and are added on to the inner separation sheets (6) or obtained by cutting out from these sheets.

5. Filing notebook according to one of the preceding claims, characterized in that the front leaf (1) has a width such that it invisibly covers up the tabs (7) of the inner separation sheets (6) when the notebook is in the closed position.

6. Filing notebook according to one of Claims 1-4, characterized in that the front leaf (1) has a width such that it enables the tabs (7) of the inner separation sheets (6) to be made visible and directly accessible when the notebook is in the closed position.

7. Filing notebook according to one of the preceding claims, characterized in that the front (1) or back (2) leaf includes three flaps (11-13) along the upper and lower edges and the side edge of the leaf (1, 2), respectively.

8. Filing notebook according to one of the preceding claims, characterized in that it can be closed by at least one closing means (8) consisting of an elastic band fastened to the front (1) or back (2) leaf by rivets (10) or the like, while being capable of sliding relative to the leaf via eyelets (9), and capable of being pulled down over one of the corners of the opposing leaf, or entirely over the latter parallel to the binder (3).

9. Filing notebook of Claim 8, characterized in that the closing means (8) can also be pulled down over one of the corners of the superimposed inner separation sheets (6) or entirely over them.

10. Filing notebook according to one of the preceding claims, characterized in that the binder (3) is of the spiral type.

11. Filing notebook according to one of the preceding claims, characterized in that the notebook pages are perforated to enable them to be filed later.

12. Filing notebook according to one of the preceding claims, characterized in that other notebook pages or external documents can be filed in the various compartments between the inner separation sheets (6).
